

European Community

Talks regarding a wage increase break down between Germany's engineering employers' group and the metalworkers' union. To avert its first strike in seven years, the parties hastily agree to higher wages. Economists predict the large wage increase will have a negative impact on the German economic recovery. In response to corporate panic concerning possible inflation, the European Central Bank announces they will raise interest rates. Without timely information on the European markets, domestic and international revenue strategies could easily be destroyed. Are your clients' business interests vulnerable to unfolding European events?

The **European Community CustomWire** provides insight into the major business, financial and breaking news in Europe. Comtex's **European Community CustomWire** helps you and your clients find investment opportunities by providing real-time information on a variety of topics including management and corporate trends, earnings projections, international trade issues, and analysis on the global equity, fixed income and commodities markets.

The **European Community CustomWire** features a diverse blend of contributors and includes items written from a global perspective from publishers like **BBC Monitoring**. In addition, European sources like **EFE News Service**, **HUGIN** and **M2 Communications** are able to provide a unique regional perspective.

Make sure your clients have all of the information they need for investing and doing business in the marketplace--and make sure they have it before everyone else. Keep your clients' profit margins intact with the **European Community CustomWire**.
